THE RATINGS SYSTEM EXPLAINED

Here at MEAN MACHINES we are committed to giving you the most in-depth console reviews. Here's how our ratings system works.

GAME DIFFICULTY

This tells you how easy or tough the game is. If you're a novice player, easy games should keep you happy. If you're a veteran joystick-jockey, medium or hard games are recommended.

LIVES

Tells you how many times can you die and still return from the grave.

CONTINUES

Tells you how often you can restart from where you died. Beware, too many continues can allow you to finish the game too quickly, and seriously damage your enjoyment.

SKILL LEVELS

Many games let you fix the difficulty level for yourself, so you can increase the challenge if you get good at it. This tells you how many skill levels there are.

RESPONSIVENESS

Is it humanly possible to avoid that mutant's death-beam, or does the joystick refuse to obey your frantic commands? This section lets you know!

PRESENTATION

This is an important part of any game. Are the instructions clear (and in English)? Do the option screens make sense and look pretty? Is the screen well laid out? Is there plenty of in-game info? This rating tells you all.

GRAPHICS

This includes not only the quality of the sprites and their animation, but the backgrounds as well. Graphics are judged not only on their prettiness, but on how well they are suited to the game.

SOUND

The difference between a booming, catchy intro tune and a few weak beeps that sound like a dying Spectrum is indicated here. Music and effects can make a big difference to a game, so don't ignore this factor.

(C) MEAN MACHINES

No part of this magazine may be reproduced in any way without the express permission of the publishers. If permission you do, you'll get the cancerous allopate treatment! So don't even think about it!

COMPETITION RULES
 No EMAP employees or their immediate kin may enter. But everyone else, except from Oweywey Britain at West Womwood because he's a welly. The Editor's decision is final, and no correspondence shall be entered into. So you can whinge as much as you like, but it won't get you anywhere.

FINALLY
 Launching a magazine is no easy task. There have been many nervous breakdowns during the past few weeks, and many of us don't sit down any more because we've worked our bellies off. But hey! That's publishing for you.

LET'S GO!!!

A very warm welcome to MEAN MACHINES, the brand new all-consoles magazine. Yep, it's consoles all the way - you won't find anything about computers in these pages!

The machines we're covering are the Megadrive Nintendo, Sega and the new Amstrad GX4000 (although there's nothing about it this issue, 'cos it's so new there are no games available for it yet). If you've got one of these machines (or all of them if you're really console crazy), stick with us. We guarantee that you won't find better reviews, news, previews and tips in any other magazine!

If you've flicked through the magazine, you'll have already seen that all the reviews and previews are at least two pages long. On them you'll see loads of glorious, full-colour screen shots showing all the action, fax boxes revealing tasty bits of game information or trivia, and comments about the game

from both reviewers so that you get two opinions for the price of one. Plus there's the most detailed ratings system you'll ever see, telling you all the facts you want to know.

The tips section is bulging at the seams with highly useful hints and cheats, and there's our brilliant tips helpline for players who've got themselves stuck. There are five pages of red-hot news from the UK, Japan and America, charts showing the top-selling console games - as well as Q+A, the place where you can get all your questions answered!

We hope that you like the format and layout of the magazine. If you have any opinions - whether positive or negative, or ideas that you think might make MEAN MACHINES even better, write to us. We'll be only too pleased to hear from you.

Right! That just about wraps it up for this month. I'll see you in four weeks time.

WHO'S WHO?

JULIAN "JAZ" RIGNALL

Well known to readers of C+VG, our Jaz has a long history of gamesplaying expertise. He was twice crowned the UK Arcade Champion in the mid-80's, has many world record scores on both coin-ops and console games, and is current Captain of the UK Video Game Team (which won the European Championship title last year and the World Title this year). Arcade games are his favourite - but really he'll play anything that's good.

OZ BROWNE

Oz designs all the pages in the magazine. And even though he's amazingly busy he still manages to sneak into the games room for a quick blast - something like Thunderforce II will keep him amused for hours on end. When he's at home he relaxes by... playing on his Megadrive!

MATTHEW REGAN

Call him Matt. He was an Amiga fan before he joined MEAN MACHINES, but fell in love with consoles as soon as he walked into the office. He likes all sorts of games, but is happiest when his brain is being exercised as well as his reflexes.

GARY HARROD

He's the guy that paints the cover and draws all the pictures in the mag. But given half the chance he'll drop his crayons and finger paints and rush into the games room for a session on the latest console. Mega Games, Arcade conversions are his favourite - he certainly took a long time taking photos of Truxton!

ROBOCOP II

British software house Ocean have just announced their first Nintendo game - Robocop II. It's based on the film that will premiere in mid October and features everyone's favourite tin cop as he battles the evil drug barons who are causing chaos in Detroit by selling a highly addictive drug called Nuka. The game is mainly platform-based, but there are also two puzzle sections and an Operation Wolf-style shooting gallery. Julian saw the game last month and reckons it's the best thing he's seen on the Nintendo for a long time. Watch this space for more pictures....

AND ROBOCOP TOO

Robocop also features in Ocean's first Gameboy title. Based on the first film and playing very similarly to the massive-selling computer version that were released last Christmas, Robocop should be just as massive in hand-held form.

EXCITING NEW CONSOLES LAUNCHED!

This year's brilliant Computer Entertainment Show at Earl's Court saw the UK launch of two crucial consoles. MEAN MACHINES brings you the lowdown...

MEGA, MAN, MEGA!

First off is the Sega Megadrive, eagerly awaited in this country since the first reports of the machine arrived from Japan over two years ago. It features arcade-quality graphics and sound and has plenty of amazing games available for it. All this potential does not come cheap, however, as the machine retails for around £190 - but this includes the game *Altered Beast*. Machines should be in the shops by the time you read this.

GET YOURSELF A HAND JOB

Nintendo have finally released their hand-held games machine, the Gameboy. This small wonder has taken the US by storm and looks set to do the same here: it features a black and white screen, but the graphics are great. The package comprises an interplay lead (to allow you to hook up your machine to another for simultaneous two-player battles), batteries, the excellent puzzle game *Tetris* and of course the Gameboy itself. This package will set you back about £70 and is in the shops now - so start saving!

MASTER SYSTEM GOES MANIC

Three conversions of classic games are to be released on the Sega Master System early next year via the auspices of now software company, Technomic. First up is *Pacmania*, starring that wacky isometric pill-eating yellow dude, *PacMan* and his arch-enemies, the Ghosts. This version apparently boasts secret rooms not included in the other formats. Wow!

Populous is also due for release before Easter 1991. This game casts you as nothing less than a God who is responsible for his followers. It is this half as good as the Megadrive version (reviewed in next month's MEAN MACHINES), it'll be a corker.

And finally, later on next year expect the Master System premiere of *Shadow of The Beast*. This caused a lot of excitement on the Amiga when released because of its amazing graphics - unfortunately the gameplay wasn't so hot. However, this is going to be tweaked on the Sega for maximum enjoyment! We wait with baited breath.

INSECTOR X

A Megadrive horizontally scrolling shoot 'em up just released in Japan is Insector X, loosely based on the arcade game. It features what looks like a macho laser-toting fairy (the winged kind) who flies over the terrain blasting robotic insects who're terrorising the neighbourhood. There are plenty of extra weapons to collect and heaps of end-of-level guardians to take care of. We'll be checking the game out in a forthcoming issue - so watch out for it.

EA HIT CONSOLES

Electronic Arts are soon to be releasing Megadrive software in this country. First batch will be Populous, that amazing God-simulation that seems to be popping up on all machines. Budokan, an in-depth martial arts simulation featuring full training options and over 25 different moves, and Zany Golf, a highly entertaining mini-golf simulation. All will appear at the end of October.

Later on in the year, expect to see Megadrive versions of Battle Squadron, a slick up-the-screen blaster with extra weapons. Sword of Sodan, an arcade beat 'em up with huge sprites and something utterly astounding indeed. You'll have to wait until next month to find out what it is! Aren't we rotten!

JAPANESE MAGS

If you're really astoundingly keen on consoles and have plenty of bucks to spend (or a very compliant parent) you can get loads of information from the amazing Japanese console mags that are available (though very difficult to find) in this country. They are all in Japanese (of course) but the huge numbers of pictures of games we can only dream of seeing over in this country (particularly the stuff on the new Nintendo console) make them essential reading (well, looking anyway) for console addicts everywhere. Here's the Mean Machines top three:

FAMITSU EXPRESS: All consoles, brilliant pictures.

MEGAORIVE FAN: More of the same but just for the Megadrive.

LOG-IN: General all-round computer title, but with lots of console coverage and particularly good info on new developments like CD-ROMs and stuff.

Where can you get 'em? Well one good place is Nippon Books in London - but don't say we told you. Cost varies but you won't see much (or any) change from a fiver.

DOMARK'S DONE A DEAL

Another UK software company who's just signed up to produce Soga games is Domark. As we go to press, they haven't yet announced which games they're going to program - but their home computer releases include The Spy Who Loved Me, a superb game of the James Bond film, and a whole heap of coin-ops, including Escape From the Planet of the Robot Monsters, Badiende, Herd Drivin', Klax and Toobin! We want Robot Monsters and Spy Who Loved Me please!

GOLF CLUBS AND WOODEN CLUBS

US Gold have just announced the next two games they'll be releasing on the Sega - Leaderboard and Heroes of the Lance. Leaderboard is a conversion of the computer golf game, and even though it's getting on for four years old, it's still one of the best golf simulations ever released. The Master System version should be a corker!

Heroes of the Lance is a conversion of the computer arcade-style role playing game, and features all the characters that appeared in the Dungeons and Dragons books! If RPGs are your cup of tea, look out for this - apparently it's going to be a real winner.

MEAN

SPOT A CONSOLE CORNER

Have you noticed how many references there are to Consoles in American TV programmes and films? Not obvious things like the Super Mario Bros cartoon, but gags and side mentions in things like Family Ties and Parenthood (Grandma was playing a Nintendo near the end of the film).

Here at MEAN MACHINES we thought we ought to celebrate all this media coverage by awarding a special prize each month (if we get any entries that is) for the most interesting reference spotted about a console on a TV programme.

So if you're watching the telly and someone plays with or even refers to a console, jot down what is said, what programme it was on and send it off to us at: IVE SPOTTED A CONSOLE ON TELLY, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGTON LANE, LONDON, EC1R 3AU. Don't forget to tell us what console you have and you could win a brand new game courtesy of us.

MEAN MACHINES 12

THE LAST NINJA

System 3's highly successful computer game, Last Ninja II, is to appear on the Nintendo some time next year. It's a sort of isometric 3D game which casts you as the eponymous Last Ninja, who's on a baddie-bashing quest for truth, justice and freedom.

We'll be taking a good look at this game in a forthcoming issue - watch out for it.

ACCOLADE'S E-MOTIONAL HARMONY

A version of E. Motion is to be released on the Game Boy under the name of Harmony (as it's known in the States). Instead of multicoloured balls (oo-er) this has triangles, squares, and circles to represent the molecules of the original. Harmony includes all the levels of the home computer versions, and is promoted in the US as a stress reliever. Julian and Matt strongly dispute this - addictive though it is, the game can be infuriating beyond belief.

PARADROID STORMS NINTENDO

Hewson's Paradroid, one of Julian Rignall's all-time favourites Commodore 64 game looks set to turn up on at least one and possibly several different consoles. Nothing is finalised yet but playtesters for at least one Japanese company were apparently well impressed with Paradroid's classic mixture of pure out-and-out blasting and genuine strategic thinking.

Paradroid won't be the first offering from this UK company to get consoled. Previous offerings have included the tabulous Nebulus (renamed Tower Toppler) and the nearly-as-tabulous Cybemoid. If the rumours are true we can't wait!

CONSOLES WE ONCE LOVED:

NUMBER ONE: ATARI VCS 2800

The Grandfather of all cartridge consoles is the ancient Atari VCS. Launched in 1976 at the price of £128.99, this beastie was quite a stunning machine for its time. It featured colour graphics, decent sound and (for then) a huge memory - all of 4K. Games available for it included top arcade titles like Asteroids, Space Invaders and Lunar Lander - not surprising, really, that it took the world by storm. Tens of millions of machines were sold, and during the very early eighties, loads of software was released for it.

However, when the more powerful computers such as the Commodore 64 appeared on the scene in 1983, the VCS began to look very dated indeed, and the sales of the machine and software slowed down to a crawl. However, over the last seven years the machine has still continued to sell in small numbers, and even now this ancient relic can be bought today - it costs around £30.00 and games cost about £19.00! It might be cheap, but by today's standards it's a very bad buy - the graphics look as though they're constructed of Lego blocks, and the tiny memory means that games are very limited and repetitious. Still, if you manage to get the chance to play on this museum piece, give it a go. It's great fun playing this slice of history and seeing what people thought was brilliant back in older times!

NEWS

FROM JAPAN

IT'S NEARLY SUPER FAMICOM TIME

November 21st is the day that Nintendo have set for the Japanese launch of their Super Famicom - the 16-bit Nintendo. Two million machines will flood the market and Nintendo expect them all to be snapped up before Christmas. Those who pool-pool their claims might be less sceptical when they've read the following facts. The machine will cost £120.00, is stacked full of custom processors that can produce tiled 3D graphics, rotate the screen, scroll four different playfields at any speed and direction simultaneously and produce giant sprites, as well as make 12-channel digitally encoded (that's better than sampled) sound via its PCM sound chip.

"A ha!", we hear the cynics amongst you yell, "it doesn't matter if the machine's brilliant - what about the software". Well, apart from being 100% compatible with all existing Nintendo software (giving it an instant library of some 400 games, many of which are brilliant), there's a whole load of new, specially-written software that'll be available when the machine is launched. Arcade titles include from the R-Type II, Capcom's Final Fight, Konami's Gradius III, Super

I BRING YOU HELLFIRE

A rather jolly horizontally scrolling shoot 'em up which didn't really set the world alight when it appeared in the arcades last year was Topolan's Hellfire. But when it's released in Japan on the Megadrive later on this month, it should be huge. It's the usual power-up, big end-of-level baddies affair, but has a neat feature in the way that you can select four different directions of fire and also has a brilliant series of soundtracks. We'll be previewing it as soon as possible.

Ghosts 'n' Ghosts and Jaleco's Big Run. Also coming out are Populous and Sim City (two superb "God" games that, respectively let you control a race of your own people and construct cities at your own), a golf game, an amazing looking flying game, a racing game called F-Zero, a conversion of the rather ordinary UK computer game, Bomblax and of course the real bogle - Super Mario TV!

TOTAL RECALL

Arnold Schwarzenegger's latest blockbuster movie, *Total Recall*, is about to be Nintendo-ized by Acclaim. The game is a multi-level affair, featuring an almost cute Arnie as he battles through a Martian city to save the nylants. The game will be released in America this month - when we'll see if in this country is anyone's guess.

Although there's no news of a British release, Dick Tracy - The Movie has been released on the Nintendo in the States. A platform game with comic-style interludes, Dick has to track down Big Boy (hmm...), Ichy, Flattop, and the rest of the crooks, as well as scan mug shots in order to gain extra information.

TENGEN GOES MEGADRIVE

Coin-op giants, Tengen, are working on several new Megadrive titles, which will be launched first in America. Cybarrell has been out for about four weeks, now, and is a conversion of the robotic American Football coin-op. It has all the features of the original machine, right down to the speech, music and moves - great stuff.

Klax is another conversion, and should be available in the States by the time you read this. It's

BOTS AND BALLS

Nintendo are releasing the first ever officially licensed pinball game - William's Pinbot. The lads here at MEAN MACHINES reckon it's a winner. Although the graphics are not the prettiest ever, the ball movement and responsiveness make this a very accurate portrayal of the real thing. Unfortunately there are no plans to release Pinbot here until some time next year but expect a full review when it arrives.

NEWS

FROM THE USA

REVENGE OF SHINOBI

▼ Don't accept death - get up and have another go!

Become the hardest Ninja imaginable - swing your katana, throw your shuriken, use your magic, and generally beat seven types of doo-doo out of the fiendish foes determined to stop your progress. Anyway, it's a good thing you can do all these stunts as the baddies (the Zeeb) have kidnapped your girlfriend: to rescue her you must travel around the world, destroying their bases as you go.

Shinobi comes with him a limited number of shuriken (which can be replenished as the game advances) as well as his sword. He can also lock his foe, jump, somersault, and do a combination somersault/shuriken-spray attack. The best form of attack however is the devastating Ninjitsu magic; this comes in various forms depending on the game's level, and is crucial in order to defeat the end-of-level bosses.

With eight stages, each subdivided into three parts, and a big baddie to beat at the end of each one, *Revenge of Shinobi* is a huge game. It includes animated sequences and a host of options. Check out the screen shots....

WHERE IN THE WORLD...?

The locations are many and varied as you traverse the globe. You start in a dojo in the Far East and then progress to caves and waterfalls. Other locations include skyscrapers, trains, motorways, the back of a lorry, docklands, Chinatown, and even an army base! Perhaps the most exotic locale is on board an airship. Here caution is required to avoid being sucked out and falling to your doom!

▲ If you want this many shuriken (and who doesn't?), watch an upcoming Tips section!

▼ Wait for the pillars to descend, then jump.

BEAT THE BOSSES

As in all games of this type, the end of each level is patrolled by a giant guardian who must be beaten. On the first level there's a giant robot eumurel, followed by a Shadow Ninja in a disco! Then there's a giant bomb, guarded by a laser defence system, a Terminator Android, a giant truck packed with missiles, Spiderman and Batman lookalikes, Godzilla, and finally the head baddie himself - The Meister. As you can imagine, he's a real toughie!

AN ARMY OF BADDIES

The Zeeb army is a large one, and features a variety of soldiers. On level one there's ninjas, flying ninjas, robot dogs and samurai. On later levels there are machine-gun wielding soldiers, grenade throwers, Rambo lookalikes with giant flame throwers, karate experts, female ninjas and robot defence systems! And they're all out to stop you!

COMMENT

This has to be one of the most outstanding games on the Megadrive - or any console, come to that. The graphics are exquisite, the music superb, and the gameplay out of this world! I was suitably wowed by this game, and you will be too: there aren't many games around that are a match for this, which really pushes the Megadrive to its limit. I can assure you that you will be ecstatic with

MATT

this if you buy it - it's what you bought a Megadrive for in the first place!

IT'S A KIND OF MAGIC

Shinobi has access to four types of Jitsu magic, and needs them in order to get past the bosses.

FUSHI: Creates flickering after-images of Shinobi. These take all the damage for you until there's none left.

IKAZUCHI: Causes lightning around Shinobi's body which protects him.

KARIU: This magic creates sheets of flame which occur the screen, giving any baddies serious grief.

MIJIN: Makes Shinobi explode in ritual suicide. Loses a life, but has a devastating effect on the opponent.

▼ Unleash your magic to devastating effect!

▲ The first guardian - climb the wall on the left and let loose your shuriken!

COMMENT

JULIAN

I'd be more than impressed if I'd played this game in the arcades. But on the Megadrive? Wow! It's an absolute treat for the ears and eyes. Each level is a graphical masterpiece, from the depths of Chinatown to the top of the tallest skyscrapers, and the animated opening sequence will leave you gasping with admiration. The sprites are simply superb - the animation on all of the enemies and Shinobi himself just has to be seen to be appreciated. On top of that are the incredible rock soundtracks and stunning sound effects! All that would be useless without decent gameplay, but Revenge of Shinobi doesn't disappoint here. It's challenging and amazingly addictive and keeps you glued to the machine for hours at a time - I just didn't want to stop playing. Revenge of Shinobi really shows off the abilities of the Megadrive - if there's one game to buy for it, it's this!

SECRET BONUSES

Revenge of Shinobi is packed full of secret bonuses - somersaulting and firing in certain places may uncover extra energy, bonus lives or even ninja magic! They're all tricky to find, but expert ninja should be able to discover them all!

SILENT SERVICE

Silent Service casts you as a submarine commander during World War Two. You must hunt down convoys and sink them while avoiding the destroyers that guard them. The game switches between views from your periscope and strategic displays of your vessel, and maps may be accessed to pinpoint the enemy's location.

On board sonar warns you of approaching destroyers and lets you know when the enemy has been hit by your torpedoes or gun. Options allow you to select practice modes or go straight into missions which include night attacks, surface raids, and cat-and-mouse actions with the depth charge carrying destroyers.

Successful hunting requires close shots but it is often better to keep your distance and manoeuvre into a position that allows an unaware convoy to steam straight towards you, saving you from having to chase it all over the Pacific!

SUB-OPTIONS

The difficulty of your mission is determined firstly by your rank (which varies from midshipman to captain). Other choices to make like more dangerous include limited visibility, zig-zagging convoys, deadlier destroyers, and even the chance that some of your torpedoes are dud!

WORSE THINGS HAPPEN AT SEA

Submarine crews during the last war did not lead glamorous lives. They spent weeks at sea in cramped, unhygienic conditions in constant fear of attack from the surface, knowing that if hit by depth charges they faced a cold and terrifying death. Supplies were limited by space, so illness caused by vitamin deficiencies were common, as were psychological problems because of overcrowding.

▲ A little closer next time!

▲ The map screen - you can zoom in or out to locate the fleets.

▼ A ship has been sighted - so check the distance before firing.

COMMENT

MATT

Silent Service is one of those rare creatures: a strategy game for the Nintendo. It has a depth (no pun intended) that is normally found in 16-bit computer games. In that sense the game is a refreshing change from platform and shoot 'em up games. The graphics are good and the array of options make the game easy to get into, but I found the game somewhat lacking in atmosphere and real excitement, especially as there can be long gaps between the action. Despite this the game is a worthy addition to any collection and is up to Microprose's usual high standards.

◀ The selection screen - decide how realistic you want your mission to be.

KNOW THE SCORE

Each enemy vessel is worth "points" based on its tonnage. Therefore tankers tend to be worth more than troop ships in your attempts to cripple the Japanese war effort. Destroyers aren't particularly heavy, but it's a good idea to sink these first - before they sink you.

▶ He's in your sights, and you're closing fast! Firing torpedoes.

▶ A hit! But at this speed you're going to collide with the ship. Better make sure it's going to sink!

▶ He's sinking fast, but issue the order to dive. The destroyer's near, and depth charges can win your day!

▼ Check the gauges to get an overall guide to the state of your sub.

▼ Sonar reports help to determine if your attacks are successful.

GPM LEAKAGE

▲ The damage screen allows you to locate problem areas, as well as giving you a pretty picture!

TYPICAL TORPEDO

THE HUNTED

Japanese convoys consisted of cargo ships, tankers, troop ships and escorts of destroyers. Of these, the tankers, with their vital supplies of oil, were the most important targets to the American subs. The sonar equipment carried by the convoys was top notch and their gunnery was greatly feared. However their surface radar and depth charges were not too efficient, allowing the subs to make devastating night raids on Japanese shipping.

COMMENT

JULIAN

I'm not usually a fan of this type of game - there are far too many controls and not enough things to blow up for my liking! However, once you get into the game, the action becomes quite tense as you start hunting down and destroying war ships before they get you. The multitude of difficulty options gives the game plenty of lasting appeal and maintains the challenge. I wouldn't recommend this to an arcade fan, but if you're after something a little different, Silent Service is well worth looking at.

IMPOSSIBLE MISSION

The evil Professor Elvin Alombender has hacked into defence computers around the world and unless he's paid an enormous ransom within 12 hours will launch all nuclear missiles and obliterate humankind. Sounds like it's time to call Special Agent 4125 to sort out the situation. But remember - the clock is ticking.

The world saving mission involves penetrating Alombender's 32-room underground bunker and tracking him down before he destroys the world. Simple? No chance - the place is riddled with robot defence systems who are alerted to Agent 4125's presence and fire out for his blood. If 4125 touches a robot, or is caught by the electric bolts they fire, he's stunned and ten minutes is knocked off the timer.

Alombender is locked behind steel doors in one of the rooms, and to enter 4125 must find and assemble a secret codeword from a microfilm. Evil villain that he is, Alombender has shredded the microfilm into 32 pieces and hidden them all over the bunker, so 4125 has to search all the furnishings in the place to find the pieces of film.

Once all the pieces of film have been collected, 4125 has to assemble them together to obtain the password - and then he can open the door and give Alombender a good kicking.

MICROFILM ASSEMBLY

Once all the film pieces have been collected, 4125 has to assemble them to form an 8-letter password. Each letter is obtained by overlaying four matching microfilm pieces to make a solid rectangle. This is tricky since the pieces are all jumbled when they're collected, and have to be rotated to fit together! It takes quite some time to solve the puzzle - so make sure you leave yourself enough time to do it AND get to Alombender's lair!

ATHLETIC AGENT

Agent 4125 is a very athletic hero - he can run at speed and somersault, which is very useful for vaulting over robots without touching them, or leaping to a higher platform. He can fall any distance on a screen, but if he falls into a hole at the bottom of the screen, ten minutes is knocked off the timer as he climbs back out.

IMPOSSIBLE MISSION

TIMER TROUBLES

Every time 4125 is touched by a robot, or gets hit by a electric bolt, ten minutes is knocked off the timer. This might not sound like much at first - but those minutes quickly mount up as you explore the bunker, and before you know it, the twelve hours are up and your mission is a failure

LOG ON

As well as finding microfilm pieces, there are also robot snooze and lift reset pass cards. The snooze disables all the robots for a limited period of time, and the lift resets return all lifts in the room to their original position - useful if you've got yourself stranded on a high platform. To get them to work you have to log onto one of the computer terminals that are found in each room, and enter the snooze or lift reset pass cards. Easy, eh?

SEGA

REVIEW

A You have a strict time limit, so don't hang around!

A The music memory game - win it for extra robot snoozes.

COMMENT

JULIAN

Impossible Mission is one of my all-time favourite games - its excellent graphics (check out the amazing animation on Agent 4125 and the robots) and superb sound effects (including sampled speech!) gives it a fabulous atmosphere. The gameplay is simply brilliant, testing your reflexes to their utmost as you leap and run around trying to avoid the robots, then requiring brain power to piece together the microfilm. It's certainly a tough game, but even if you do complete it, because the game is different every time you play it, you can keep on coming back for more. If you want to play one of the best games available for the Sega, look no further than Impossible Mission.

THE DREADED DROIDS

The robots in the bunker all follow preset patrol patterns - some are stupid and just patrol a set course no matter what happens - others follow 4125, or chase after him once he's spotted. Make sure you study the robots when you enter the room so at least you can predict what they're likely to do.

REVIEW

Evil Elvin Atom Bender has a strange sense of interior design - well, he is mad after all!

Log onto the terminal below and activate a robot snoozer!

The banded sections are lifts, usually guarded by robots.

COMMENT

MATT

impossible Mission is one of the best games to date on the Sega. The graphics are bright, robust and colourful, and extremely well animated. 4125 runs, leaps and somersaults like an Olympic champion. The sound fits the bill perfectly, with buzzing robots, Atom Bender's taunts and the nerve-shattering scream as 4125 plummets to his doom. Overall, IM has just the right mixture of arcade action and puzzle-solving elements to ensure that once you start, you won't put it down until you've completed it. An essential purchase, and recommended without hesitation.

BUBBLE-LEAD

DON'T POINT THAT
THING AT ME

Megaman returns to save us all again! The evil Dr. Wily has unleashed eight robots on an unsuspecting world, so your mentor, Dr. Light, sends you to defeat them in their hideouts.

Each level is selectable at the beginning of a game, allowing you to start at a harder level if you wish. Your opponents include Metalman, Bubbleman, Airman, and Quickman, each has their own set of guardians to defeat as well as their own special form of attack. Our hero can leap and shoot his way through the screens to get to the enemy robot who is found at the end of each level.

After defeating each end-of-level badgie Megaman can then utilise its weapon to his own advantage, and at certain points Dr. Light bestows bonus gifts upon you. The trick is knowing when to use the options available to you - Quickman's boomerangs can come in handy against difficult-to-shift creatures, but Woodman's shields are fairly useless against a tough attack.

The eight-way scrolling screen combined with great graphics and a tough but fun challenge make this a game to watch out for - we'll be reviewing it in full soon!

The spiffy weapons to be collected add a great deal to the game. They can be selected at any point (once you've collected them) and used to devastating effect in the right place. They are colour coded to help the stupid, so there's no excuse for not shouting, "Get bubble-lead deeth, meley!"

TAKE YOUR PICK

The selection screen lets you tackle any badgie you like. Bubbleman is the easiest, followed by Airman and the rest of the baddies in a clockwise direction. Choose your foe, press the start button, and get shooting. But be careful not to get too cocky - later levels are tricky!

▲ Things are getting tough!

MEAN MACHINES

The scourge of the spaceways, the giant lizard Zelos, has devoured the twin worlds of Gradius and Latis. The only chance of escaping Zelo's stomach lies in the shape of two super starfighters, the Gradius Industries Vic Viper, and Lati's RoadBritish Space Destroyer - armed to the teeth with the very latest in military technology. Who're the dumb schmucks who get to fly 'em? Guess who...

So sets the scene for Life Force, or Salamander as it's better known in the UK. This one or two-player intergalactic blaster sprang into our arcades in mid-1986, as the sequel to the smash coin-op Nemesis (or Gradius on the NES).

Life Force is both a horizontally and vertically scrolling shoot 'em up, featuring bundles of bolt on weapons, alien bad guys, big end-of-level beasts and lots of huge explosions. The object? Just get out there and blow 'em to oblivion!

Life Force

Negotiating the spacecraft!

A steady hand gets you through this part.

Getting a little on the warm side!

Accuracy is better than blind firing.

FEEL THE FORCE

Life Force was one of a series of three coin-ops that appeared between 1985 and 1988. The first, Nemesis (or Gradius as it's known to NES owners), was one of the first shoot 'em ups to include enhanced weapons, multiple shot power and giant end-of-level guardians. A year later, Salamander appeared, and in 1988 Konami released Vulcan Venture, which is soon to be released on the NES under the title of Gradius II. Vulcan Venture featured full 8-way scrolling, and a choice of craft and weapons. Some of the aliens had to be seen to be believed, with massive fiery phoenix-like creatures, and some hideously gut-wrenching alienet

COMMENT

Featuring amazing graphics, great extra weapons, simultaneous two-player action and a huge variety of aliens to blast into oblivion, Life

JULIAN Force is a blaster and a half! The way it switches between horizontally and vertically scrolling landscapes adds extra variety to the gameplay, and the different strategies required to beat the mean end-of-level guardians makes this both challenging and addictive. Life Force is by far the best shoot 'em up currently available on the Nintendo - if you're into games of this type you'd be silly to miss it.

THE POWERS THAT BE

TRANSORIVE "SPEEDUP"

BOOSTER: Increases both speed and maneuverability of your ship.

Recommended.

GRADCORP FORCE SHIELD:

This protective energy field envelops your ship, protecting it for a short while from collision with enemy missiles and vessels.

CP-26 "RIPPLE" LASER: Hoop laser, which progressively gets larger the further it is from the ship. Reasonable for medium-level destruction, but not too fast.

FAFSSM-17 DESTRUCTO

MISSILE: These fire and forget projectiles blast from above and below the ship in tandem, and are multiplied twofold with each "multiple".

TX-3 MACROLASER CANNON: This is your basic weapon. Single shot, pretty ineffective.

LCX MARK V PLUTONIC

LASER: This baby slices through steel plating like a hot knife through butter. Probably the most effective weapon available.

RB-9 "MULTIPLE" OPTION: A glowing sphere which tracks the movement of your ship, automatically equipped with the same on-board weapons.

▲ The first boss - brainy, eh?

COMMENT

MATT

Salamander may be getting on a bit now, but it still ranks pretty highly as one of the better shoot 'em ups. So I was extremely pleased to see that Life Force retains almost all of the major ingredients that made it the arcade parent so enjoyable. The graphics and sound are as close as one could hope for, and the playability is just about right - not too easy, nor over-impossible. Some of the later levels are a bit complex, but practice makes perfect, as they say. If you're a fan of the coin-op, or just love a good blast, don't miss it.

Wait until he has thrown his boomerang, run up to him and do a flying kick, then follow it up with a few low kicks.

LEVEL THREE BOSS

Wait until he has kicked, then run up to him and rapidly do low kicks.

LEVEL FOUR BOSS

Wait until he has thrown a bomb then walk up to him and do low punches to his chest. Once half his energy has gone he will reincarnate; move back and wait until he has thrown the bomb, then do low punches to his chest.

LEVEL FIVE BOSS

Let him make the first move, then just do what you feel is a good move.

MEGA MAN

FIRE MAN

Jump when the flame tongues are descending to get past. The same tactic should be used to get past the sheets of flame. To kill Fire Man himself, just keep shooting, even when hit. Don't turn your back on him - you'll regret it!

ELEC MAN

Use a super weapon on the spines. The small ladder on the right of the screen leads to a big energy capsule. The Watchers must be shot right away, as their lightning is lethal, go to the right of the disappearing steps, and wait for the noise to just about finish, then jump. The magnet beam is gained by picking up the blocks and throwing them. Avoid Elec Man's shots - they're deadly - but it only takes three shots to kill him.

GUTS MAN

You need the magnet beam to make long steps to get to the right. Use bombs on the boss and jump when he lands, but otherwise he's easy to remove!

BOMB MAN

Don't pick up the little dots or you won't get anywhere. When the Bombombs start coming down, keep to the left on the ground. Sniper Joe can be killed with fire when he is jumping or shooting, the one in the niche gains you an extra life. When you reach the second Shell screen jump from the ladder platform immediately. The boss can be beaten simply by dodging and using long range fire.

ICE MAN

Decapitate the Crazy Razys with your boomerang at the start. Use another weapon to get rid of the spines. Learn the patterns of the steps: the first is wait, jump, jump, wait, jump, jump, the second is j, j, w, j, w, j (up), j. Use the elecbeam on Ica Man in the same way as Fira Man.

You never know, you could even end up with a big prize for your effort!

NINTENDO

LEVEL ONE

Flying kick or repeatedly punch the cartwheel thugs. At the end of the street punch the Ninja Salame off the ladder as they climb down. To defeat the guardian use repeated punches in one-player mode or, in two-player mode, flying kick the beddy while your partner is being strangled.

LEVEL TWO

When you reach the top of the building climb up the final pipe. The helicopter will come quickly - jump down and run to the right to avoid its bullets. Knock the baddies off the building to dispose of them quickly. When you reach the heliplane, backflipping enemies will appear. Use flying kicks to defeat them but avoid their knives.

LEVEL THREE

Try to lure the Big Boss to the door. When it opens punch him. Do this twice.

NINTENDO

MEAN MACHINES 38

LEVEL FOUR

Use six sidekicks on the first Big Boss, repeated punches on the second.

LEVEL FIVE

At the house, throw back the firebombs to dispose of the baddies and use the same technique on the Big Boss as in level four, keeping away from the edge of the cliff. When the somersaulters appear use flying kicks. When the sky water machine appears jump onto the platforms and get rid of the Boss by standing on a platform and punching when he jumps.

LEVEL SIX

Watch out for dripping torches. Wait until all platforms appear then jump through the window.

LEVEL SEVEN

When you pass the moving platforms go through the door. You will have to kill one thug and a guardian. Use the same technique as in level one but be careful as the floor disappears. Go through the door and jump over the cogs. Climb the ladder and jump onto the platforms to reach the door.

LEVEL EIGHT

Dodge the Shadow's shuriken. When the King arrives, use a flying kick but watch his legs when your partner is being attacked; use a flying kick on them. If the King turns invisible keep jumping up into the air. When the screen flashes you have killed him.

GRADIUS

Pause the game and push UP, DOWN, LEFT, RIGHT, LEFT, RIGHT, to receive a near-full arsenal of weapons.

ROBOCOP

Once you have used your first three continues hold down buttons A and B, SELECT and START. You'll switch to the main title screen where selecting Continue will put you back to where you left off with infinite continues.

METROID

In order to defeat the mother brain you must stand in the platform where the final Zebetite was and destroy it with over 30 missile shots. You must not move from this platform unless you have to dodge the Rinks (the Fire Rings). It's best to freeze them with the ice beam and do a runner.

RAD RACER

If you press the start button while holding down button A you can continue from where you left off. Press button A and Start together in order to continue at the same place when you die. Finally, when you crash hit the START button several times to slow down the rate at which time decreases. Cheers to Jody Goodall of Manchester for that.

RUSH 'N' ATTACK

In stages four and five, if you blow up a certain land mine a secret staircase will appear.

At the end of level two stay on the left hand side and the rocket men can't get you, but watch out for the knife men.

PUNCH OUT!!

Enter code 007 373 5963 and fight Tyson himself.

獸王記

ALTERED BEAST

Stuck on this free Megadrive game? Check out these tips, sit down, have a cigar - you'll go far. The spirit wolf always comes after the two brown wolves. It an ex frog tries to suck your head off, run left or right then attack it. The quicker you transform, the quicker the and guardian arrives.

LEVEL ONE

This guardian is a demon surrounded by corpses, and he throws heads at you. Destroy him by firing with the A button, and when he throws heads, stop firing and dodge them by running left and right. Then start firing again - he takes about fifty shots.

LEVEL TWO

A plant-like creature which fires "Octeyes" at you. Fly straight at him so you are just touching the main eye, and before the pod opens to release the rest of them, use button B (the electric field). Keep pressing as fast as you can, because he's quickly destroyed.

LEVEL THREE

This is called a Moutdy Snail - a dragon in a snail's shell. Use button B and keep spinning into it.

LEVEL FOUR

The fatty crocodita. This is the hardest to destroy, as it fires small dragons and fireballs at you. As soon as it appears use button B to skim it at the top of the screen. Keep ducking and occasionally use button A when you have to avoid fireballs.

LEVEL FIVE

A large Hell Boar. It runs straight at you when the cloud has gone. Just keep using A and pulling down - it takes about 20 shots.

GOLDEN AXE

To select any level, press button B on the character select screen, push the controller down and to the left and hold down START. A small number will appear in the top left hand corner of the screen and, by using up and down on the controller you can select the level.

MEGADRIVE

AFTERBURNER

As many of you Afterburner pilots have noticed, you can get from levels 1 to 12 without getting hit by holding the joystick in a diagonal position (but keep firing off everything you've got and dock with the tanker for those hit-counts - you should be able to get an extra life by stage 12).

From stage 12 onwards, however, this method doesn't work. Instead, at the beginning of stage 12 climb as high as possible, and as soon as you see the first missiles launched towards you, dive as low as possible. You can out-lure and out-climb the missiles, which disappear off the top of the screen. Then stay down until the next lot of missiles appear and repeat as before - except climb hard. If a missile does manage to follow you, dodge it by going up or down, and then in the opposite direction as it gets close to you. You may find yourself going continually up and down, but it works!

RAMBO III

Shoot the cavern roof above Sergeant Koloff to kill him!

MY HERO

When you come to fight the end of screen yob, only use kicks to the head and don't get trapped in the corner of the screen. Using the kicks to the head you will beat him faster; and the faster you beat him the more lives you collect.

When you fight Mohikan, use the punch or the high kick only, and afterwards you'll get an extra life as well as the one you get normally.

RAMPAGE

Whenever you can, pick up a woman from a window and just hold her. If you don't eat her your score will be boosted! Don't eat bombs or punch trains as these drain your energy.

When jumping off a building, keep the up button depressed and you will climb the building nearest. When a tank fires shells at you, jump into them and you won't get knocked out.

R-TYPE

Before switching on the Sega, put both joysticks in and hold control pad one diagonally down and right, hold control pad II up and left and hold down button 1. Keep holding them all down and switch on the Sega, and keep everything pressed until the R-Type logo comes on screen. Now start a game and you'll be totally hard! At the end of level four you reach a screen packed from top to bottom with green dots. About half way through at the top of the screen is a gap in the landscape - fly up and go into it and you're transported to a bonus level!

On the continue screen (after the game over screen) a countdown starts. At this time, rotate the directional pad counter-clockwise until the countdown stops (it stops automatically). Release the directional pad and you enter the sound test. To change sounds, rotate the directional pad right to left and push button 1. There are 17 sounds to listen to.

There are two continue modes. The first allows between 10 and 12 continues. When you have died three times and the continue screen appears, rotate the directional pad of control pad I clockwise quickly and you will receive between 10 to 12 continues depending on how quickly you rotate the pad.

ACTION FIGHTER

On the name entry section, type in SPECIAL to make you bullet proof and give you an extra three lives when the timer runs out.

Another useful tip is to get rid of the helicopter when driving the car, simply turn into a motorbike and back - it'll disappear.

POWER STRIKE

To begin the game with ten lives, push joystick DOWN, RIGHT, DOWN, DOWN, LEFT, RIGHT, UP, RIGHT and button 1 twice.

RASTAN

For unlimited continues, switch on the machine and, when the Sega logo appears, hold down buttons 1 and 2 and push the control pad diagonally down-left.

QUARTET

Push PAUSE four times on the title screen and any button on joystick two for sound test.

WONDERBOY III

To instantly control all your alter egos, with loads of dosh and a complete armoury, type in WEST ONE 0000 000 on the password screen.

GOLVELLIUS

For a really crazy cheat, try entering the following code:
Q000 Q000 Q000
Q000
Q000 Q000 Q000
Q000

ALEX KIDD IN HIGH-TECH WORLD

Some of the clouds on the ninja section are yellow. Shooting them five times reveals a box worth 200 GP's.

POSEIDON WARS

To continue a game, just push the joystick, down, down, down, down, right, right, right, up, up and left.

To access the sound test, push the joystick, up, left, left, down, down, down, right, right, right, and right.

ALTERED BEAST

To continue the second time press the lower left diagonal D-button and both buttons. To continue the third time press the lower right diagonal and both buttons. The fourth and final continue can be achieved by pressing the upper right diagonal and both buttons.

BLACK BELT

When you come to the opponent in the room with the picture here's how to beat him. Trap him in the corner of the screen and duck and punch him in the stomach. Once his power is used up comes the confusing part - how can a man with no power fight back? We don't know either, but after you complete the next move he won't be fighting back. When he jumps up and tries a flying kick to your head, copy him. If you make

contact the slope dead in mid-air - and then and only then can you beat the hell out of him.

This other chest has been printed several times in different mags, but none seem to explain it properly. Press fire on the title screen to start the game. The usual red screen showing lives and levels should appear. When this screen flashes off for a second, press RESET before the game screen comes up. Things will go a bit messy, but sort themselves out later. Now you can have a whole load of kung-fu fun and frolics.

CAPTAIN SILVER

To utilise the continue option, push up and press both buttons at the same time. This works on all levels past the first one, and restarts the game at the start of each level.

CHOPLIFTER

On the second stage, fly behind the battle ship, fire and up comes Jewel!

On level 3, travel backwards past the lava pit.

Shoot the first enemy rocket base several times, and after a while Superman appears. The prisoners will now run twice as fast. Whoa!

ENDURO RACER

If you want to jump levels, on the title screen press RESET, then UP, DOWN, LEFT, RIGHT on control pad 1. You can now choose the round you want to play.

GHOSTHOUSE

Punch the light bulbs to freeze all the characters on screen. This works three times a level only.

ACTION FIGHTER

Try these passwords:

DOKI-PEN
HANG-ON
GP-WORLD

KENSEIDEN

Climb big Buddha and push up for a secret screen!!

If you want to access the round select feature, turn off the Sega, press and hold button I and it, then turn the system back on and continue to hold buttons I and II down until the title screen with the figure appears. Release buttons I and II and press the top left hand corner of the directional pad and button I. Round select followed by a number will appear. You can select the level with the directional pad and push either button I or II to start the game.

The game offers training sessions (rounds 5,6,8 etc) Use these sessions before you begin to battle the levels. If you are able to get through these training

SPY Vs SPY

When you are selecting difficulty and number of players, choose the option so that the airport room can be found from the start. Find the airport room and seal it off with traps and wait in an adjoining room. Wait for the opponent to find all the goodies, then when he tries to come through the door, he'll be killed and you can go and get the lot and head for the airport

THUNDERBLADE

When approaching the end of level fortress, move up to either top corner and hover there. The fortress should now blow up without you touching it.

In the second half of stage one (the city) you can dodge the tanks' missiles by moving in an anti-clockwise square around the edge of the screen. As in Asterbomber, however, keep firing for those valuable hit counts!

TRANSBOT

When you reach the first city, three devices appear called Hitons. If they're blasted with weapon system D, the mission will then continue on the underground level.

WONDERBOY

On title screen press button I, then press button I again twice, and then button II twice. Hold both buttons down at the same time, and press the D-Button up for a higher round.

In Wonderboy you need to collect a total of 36 dolls (one each round). On area nine, round four the doll is actually found in a fire. If you have all 36 dolls after killing the monster at the end of Area 9 you go onto round one (area 10). From now on you can't jump up levels or rounds - you can only go down!

FREE GAME

This is an older, but some new Sega owners might not be aware that there's a free game actually built into the machine. Turn on the machine while simultaneously pushing the control pad buttons and pushing upward - a maze game scrolls from the right and you can play away...

REVIEW

▲ Wonderboy in his "normal" form - this is how you start the game.

▲ Each door leads to another subsection of the game. Check all of them carefully!

WONDERBOY III

We join Wonderboy at the start of an arduous journey - a journey full of huge omens, immeasurable hardship. Our hero is just about to approach the lair of the evil dragon, the victim terrorising the realms of Mondria. Wonderboy is one step away from a blow it'll never forget...

However, Wonderboy has no idea of this particular dragon's powers. We learn about a rather lethal case of bad breath affliction. Dragon has the ability to curse his assailants, causing them to mutate into Dragon Men - a human/dragon hybrid... Three guesses who his victim happens to be!

Cursed, wretched and deformed, Wonderboy must begin a new quest - to find some way of reversing the Dragon's spell - a quest that will take him through many levels of platform infested multi-directional scrolling chaos...

▲ A case of severe halitosis.

▼ Grab the money and buy extra weapon!

▲ Power-ups litter the landscape - collect the set!

MONEY! MONEY! MONEY!

Vanquished foes leave golden coins behind which can be used to buy better weaponry, armour and other useful items at the weapons shops dotted around the map. So when you're bashing the baddies, keep collecting the cash!

COMMENT

WONDERBOY - THE COIN-OP STAR

The original Wonderboy coin-op was a fairly good horizontally scrolling platform/shoot 'em up game, and was really an attempt by Sega to cash in on the Super Mario Brothers craze. It was an instant smash and two follow-ups appeared on the arcade scene. Wonderboy III on the Master System is different to all three coin-ops, but has taken its inspiration from them, combining the platforms and shooting of Wonderboy, the adventuring of Super Wonderboy and the cuteness of Wonderboy III in Monster Lair to great effect!

MATT

This has to rank as one of the greatest Master System games ever! It has a look and feel slightly reminiscent of the Nintendo Mario series (no bad thing) and a depth of gameplay second to none. What constantly amazes me about this game is that there's always something new to discover, be it a key to a previously locked door or even a secret room! Couple that to the sheer vastness of the quest and Wonderboy III's "classic" status is assured. All in all, a very slick Sega product with universal appeal. Make sure it's in your collection - NOW!

▲ The shop. Buy power-ups and extra lives if you have the money - and if they're in stock!

METAMORPHOSIS MAYHEM

At various points throughout the game, Wonderboy can transform into different creatures - all of whom have varying degrees of skill in certain areas. Piranha Man has fine swimming abilities, Hawk Man can fly and Dragon Man can breathe fire and walk through lava. Mastering each character's strengths and weaknesses is the key to success.

▲ Try not to get a bad dose of crabs.

COMMENT

JULIAN

This brilliant Sega game kept me up late for more than a few nights when I first got hold of it. The combination of adventuring, shooting and platform action results in one of the best games of its type available on any console. The graphics are simply superb - especially when the hero changes into one of his many guises - Dragon Man is my favourite, since you can roast everything in your path with his fiery breath. The game is huge and there's loads to discover - one of the reasons why it's so amazingly addictive. If you're a new Sega owner, or simply missed out when this was released, make sure you add this to your collection.

REVIEW

One of the most evil beings in the entire Universe, Death Adder, has kidnapped the King and Princess of Yuria! And the dirty swine has also carried off the legendary Golden Axef And to cap it all, he's killed some of your family. So grab your axe or sword and put on your fighting trousers, 'cos it's time for revenge!

Death Adder's gone and hidden himself in his great big castle, and between you and him is his army of horrid creatures. Goblins, skeletons, black knights, ogres, giant swordsmen and even dinosaur riders are all present to wear down your energy bar and stop you in your tracks!

Sounds pretty tough, eh? Well, fortunately there are a few useful options on the title screen to help make life easier. First of all you can select a character - either a Dwarf, Amazon or Barbarian. After that you can adjust how much energy your character has, from six units to a suicidal one unit. You can fiddle with the control method and pick one which suits you best. There are also practice options - but more of those later. And finally there's a two-player option for simultaneous badde-bashing!

On the title screen you can choose your favourite character.

Between levels, the story of your progress is charted on a fantastic map.

Two dino riders, an orc and two against stiff opposition.

The Amazon takes the 2.0 GT Turbo.

RIDING THE DINOS

Knock a saddle off his dinosaur and you can climb aboard and use the dino to attack them! There are three makes of dinosaur - learn to recognise the best dinosaur models and grab them as soon as possible.

Dino 2.0 GT Turbo: A turbocharged reptile which breathes fire everywhere and causes mega damage.

Dino 1.3 Popular: Just swings his tail and causes a bit of damage to a badde.

Dino 1.6 GL Ghia: Spits firebombs, which are quite jolly and cause a fair amount of damage.

COMMENT

MATT

I love this game - it's got everything I want in an arcade conversion. The two-player option is the most fun - but each out, it's easy to hurt the other guy (that can be fun too!).

The Duel adds a whole new dimension that wasn't in the coin-op, and there are two new levels: this adds to my high opinion of the game. Nothing beats a great beat 'em up, and this is one of the best I've seen. It's easy to get in to, and the fun doesn't stop - although the opposition gets tougher all the time! You won't regret buying this excellent game. I'm just about to go back for just one more headbutt... and I'll still be there in an hour or two!

SWORDS AT DAWN

There are two practice options: The Duel and Beginner. The former is a one or two-player practice game which gives you the chance to fight all the foes on a one-on-one basis. You only get one life, and at the end you get a rating to show how good a fighter you are. Beginner is a mini version of the game where you have to dispose of Death Addor Jr. There are three levels to beat, and it you can complete them, you're ready for the real challenge.

JULIAN

I like a good beat 'em up. But I love a brilliant one! And this is one such game. As soon as you stick this in the Megadrive you know it's a classy product. There are a wealth of options that let you change the game's parameters, and there are also two practice options which are mini-games in their own right! The game itself is an exact (and I mean exact) copy of the arcade original bar two things - there are a couple of extra levels added onto the end of the game! Some people say that console software is expensive. But when you're getting the equivalent of an arcade machine with extra levels AND two bonus games, £35 doesn't seem like a lot of money!

MOVIN' AND GROOVIN'

All three characters have a variety of moves. There's straightforward running, jumping and hacking with their weapon. Combinations of these moves, though, gives a shoulder charge, jumping downward slice and backward roll. Learn them all and you should be unbeatable.

REVIEW

Indy's back - and this time he's brought his Dad.

Well, as far as the game itself goes he hasn't (he only appears on a still screen at the end of the game), but by and large Indiana Jones and the Last Crusade follows the plot of the film.

It's a straightforward platform and ladder game in which the hero can run, jump, punch, and (if he's collected the item) whip his opponent so that he can advance.

The first level concerns the adventurous archaeologist as a young man journeying through caves to find the Coronado Cross - avoid the baddies, climb the ropes and track down the Cross to move onto the next level, eel on a horizontally scrolling train where more baddies (and rouge circus animals) must be avoided to get Indy to safety.

Scene three sees a grown-up Indy hero searching for the shield of the Grail Crusader, an ancient knight - this all takes place in an underground cavern. Once found it's onto Castle Brunwald, then through an airship and finally to the ancient temple where the Grail is located.

As you can imagine, the game is crawling with nasty Nazis, and all have guns and knives which can do serious damage to your energy. If they connect! Being touched by just about anything is fatal - so get losing that whip!

▲ Indy climbs across the ropes to avoid the enemy.

INDY AND THE CRUS

▲ When you jump, don't bang your head on the ceiling or you'll lose energy.

▲ Leaping from rope to rope to avoid the deadly water.

▼ Grab the whip! It'll come in very useful against the enemy.

DIANA JONES

THE LAST SADE

▲ Each level is introduced by its own title screen.

MY CUP RUNNETH OVER

The Holy Grail was supposedly the receptacle of Christ's blood from the Cross, and has been the subject of many quests, theories, and beliefs. It has also been the subject of a number of movies as well as this one. The most irrefragant has been Monty Python and the Holy Grail, which featured flying cows, killer rabbits and the Knights who say Ni! A more serious approach was taken by the film Excalibur which retold the legend of King Arthur and Merlin, portraying the Grail as the ultimate symbol of faith and rebirth. In the comics world Camelot 3000 (drawn by Brian Bolland of Judge Dredd fame) has explored the idea of Arthur's return - he was, after all, the once and future King - to save Britain in its hour of need. Surprising he's not here already...

Indiana Jones is an impressive game with graphics of very high quality, but the gameplay seems to me somewhat limited in comparison. Having said that, the Master

MATT

System really needs a good platform-style arcade adventure game and this title fits the bill with room to spare. Swinging with the whip is great fun and even though the game is very tough, it's addictive and will have you playing long into the night. DIANA JONES
and the
TEMPLE OF DOOM

AT THE MOVIES

The Indiana Jones films have enjoyed enormous success since the release of *Raiders Of The Lost Ark* in 1981. Perhaps the main reason for the popularity of the films is that they reintroduced a witty, self-effacing but believable hero to the cinema, the likes of whom had not been seen since the days of Buck Rogers. Whatever the reason, the Indiana Jones series provided quality entertainment and spectacular effects thanks to the genius of George Lucas. There are no plans to make a fourth film - what a shame!

▼ Indy scales the walls of Castle Brunwald on level three.

COMMENT

Indiana Jones and the Last Crusade is almost as hard as the hero himself! From the very beginning the odds are stacked against you as you battle an amazingly tight

time limit and hordes of gun-wielding heroes. There are plenty of nasty hazards and traps to catch out an unwary Indy - so prepare to lose plenty of lives. It certainly helps if you make a map, since the game is the same every time you play it. The graphics are truly superb, with some of the best sprites and backdrops I've seen on the Sega, and the music's not bad either. Seasoned platformers and ladder fans should be in their element with this - those not so good at this type of game might find it a bit too frustrating, though.

- ▲ The airship level where the screen moves up and down to simulate flight! Watch you don't get air-sick!

Golden Axe has elicited and died its way to the top of the charts, closely followed by the stunning conversion of Ghouls 'n' Ghosts. Revenge of Shinobi follows right behind, with Super Hang-On and Forgotten Worlds completing the top five. Truxton is looking good in the number seven slot and Rambo III could well move up from number eight. Space Harrier and Thunderblade prop up the charts - will they be there next month?

Golden Axe also sits at the top of the Sega chart this month - you people obviously love a good beat 'em up. Just pipped to the number one slot is that super football simulation, World Soccer at its new re-release low price - if you haven't got it, look out for it. Ninja is next - another low-cost special, with the superb California Games and Double Dragon taking up the next two slots. At the low end of the Sega charts is R-Type, World GP and RC Grand Prix (racing games seem to be popular here), but expect Super Monaco GP and US Gold's excellent games which are reviewed this month to appear very soon indeed.

NINTENDO

It's obvious who are the Nintendo players' favourite! Mario and Link dominate the top slots this month - Mario at numbers one and four, and Link at two and three! However, Megaman and Life Force are just outside the top five, and look set to climb higher - watch this space! We confidently predict that the Turtles will storm into the charts next month - check out the review elsewhere in these hallowed pages and you can see exactly what we're talking about!

SUP MARIO

For a plumber, Mario leads a remarkably odd life.

After waking from a dream in which he climbed a staircase, opened a door and heard a call for help, Mario has climbed a staircase in a cave, opened a door and heard a cry for help! Heroic sentience technician that he is, Mario leaps through the door and finds himself in Subcon where he has to rescue the population from the curse of a vile froglike despot called Wart!

Mario's mission is divided into 20 stages, spread over seven worlds, which are packed with 29 breeds of Wart's evil servants. At the far end of each stage is a large mask which hides the door to the next part of the game, but to get through it, Mario has to destroy a boss character who throws either eggs, bombs or rocks, by grabbing the missiles and throwing them straight back.

Each world has its own type of terrain, and Mario can find himself legging it over green hills, sheets of ice, schools of whales, deadly desert quicksand, through caves—sometimes he even takes to the clouds!

▲ Oohh, it's dark in here—see if there's anything to discover!

CARRY ON CARRYING

Since his last adventure, Mario has acquired a new skill. By standing over an object and pressing the B button, Mario grabs the object and carries it over his head; then another press of the B button shows the object forward. Sometimes there are even hidden objects to pick up like mushrooms, coins, and potions!

JOURNEYS INTO SUBSPACE

When Mario plucks a potion, and throws it to the ground a door appears. Dash through the door, and he's in subspace, where pulling up plants produces coins, and mushrooms boost your life points (shown by the red shapes at top left). There are also secret weapons to be found, but you have to know where to look...

▼ Careful placing of the potion makes your life easier!

BONUS BONANZA BANDIT

If you've collected any coins from Subspace, you can play the bonus bandit. Every shot costs a coin, but if you can stop the reels on three similar shapes, or line up a cherry, Mario is rewarded an extra life!

STARS ON SUBCON

Before you start each section of each world you can choose to play one of the four characters shown, each of whom have different characteristics. From left to right: MARIO: Strong and runs fast, but not so good at jumping.

LUIGI: A slower runner than Mario, but a very high jumper. The best character for most of the early stages.

TOAD: Very strong. Unlike the other characters, Toad can carry objects without slowing down.

PRINCESS TOADSTOOL: Instead of jumping, the Princess can float in mid-air for about a second. Not very strong or fast, though.

MARIO III - COMING SOON

Mario III is set for release early next year, and features a vast playing area and a huge number of power-ups and secret tricks for Mario fans to master. In Japan, work has already begun on Super Mario Brothers IV, but while we wait with bated breath for that, Nintendo are soon to release Dr Mario, a Tetris-like in which the player has to fit together pills of the same colour. In the true Mario tradition, it's very weird, but looks like great fun!

COMMENT

Super Mario Brothers can't save been an easy act to follow, so Nintendo really had their work cut out producing a follow-up. But they've done it, and SMB2 is

MATT

even better! Cute and highly detailed characters and colourful backgrounds really make it look cartoony and fun, and the music and sound effects match the graphics for jolliness. But the gameplay's what's most important, and even in this respect, SMB2 tops the original! All the new characters and the new abilities add a further dimension to the original platform fun. At nearly £40.00 it's one of the most expensive Nintendo carts, but any fan of the original will certainly get his money's worth!

COMMENT

JULIAN

Other than that, though, Super Mario II is one of the most enjoyable Nintendo games around. Roll on Super Mario III.

Super Mario Bros II simply oozes playability. The difficulty level is perfectly set so that you always seem to get a little bit further each time you play - or discover yet another secret room or warp! Consequently the game is incredibly addictive. The only criticism I've got is that there's no score - it would be nice to be able to go for a highscore record as well as beating the game itself.

OVERALL 89%

A tremendous sequel to Super Mario Brothers.

Line up for that mailbox.

Paperboy rides into an obstacle. What a twit.

Ah! A non-subscriber! Wreck his flower bed!

PAPERBOY

A tari's Paperboy first appeared in the arcades around four and a half years ago, and cast you as a paper deliverer whose round takes him to the very strangest parts of town. In this Sega conversion, virtually all of the original coin-op's features have been included as you battle against the odds to get your papers delivered.

At the start of the game there are three streets to choose from, effectively giving three difficulty levels. Each level is split into seven sub-levels, each of which represents a day of the week. The object is simply to survive until Sunday.

At the beginning of each round you're shown a map of your delivery route. You must deliver papers to every subscriber, by throwing them either into their mailboxes or on their doormats as you cycle past.

Non-subscribers should be treated with the contempt they deserve, so throw spare papers through their windows and ride all over their nice flower beds for bonus points.

If you fail to deliver a paper to a subscriber, he cancels his subscription - a perfect round of deliveries, however, results in new customers!

Things are complicated by the presence of various obstacles such as lawn mowers, buggies, cassette players, and even ghosts! If you hit any of these, a life is lost - so careful with those handlebars.

The perils that await you on your route are numerous. First off, all stationary objects such as mailboxes and traffic cones must be avoided, which is fairly straightforward. Other dangers are trickier, for example poodles that come scurrying towards you and out-of-control motorised toy cars, tyres and even breakdancers that zoom around in set patterns. They're all deadly - so you have to be pretty nifty with your bike to avoid them all!

oy

▲ Paperboy's girls gang greets him at the end of a level.

COMMENT

MATT

I remember crowding around the coin-op all those years ago - and this verlon captures that "can't leave it alone" feeling! The originality of the arcade game coupled with the brilliance of this conversion make this a real winner as far as I'm concerned: It's the best translation onto a home machine there's been. It's difficult, but doesn't seem to be while you're playing it - that's the beauty of this game! Whether or not you are a fan of the coin-op, this will keep you happy for a long time, so don't delay: buy Paperboy and get delivering!

PRACTICE MAKES PERFECT

There's a bonus round at the end of each day which not only helps improve your aiming abilities - there are targets all along the course to hit for bonus points - but also lets you practice maneuvering, with ramps and tight turns to keep you on your toes. These skills are important for when you progress from Easy Street to Medium Road or Hard Way (the three different levels).

THE ORIGINAL COIN-OP

The original Atari coin-op appeared in early 1986 and wowed arcade goers with its combination of great graphics, sampled speech and unusual handlebar controls. However, it did have one flaw - right at the end of the bonus round, cycling between the grandstand and the fence sent the scoring system crazy, and you'd end up with well over a billion points!

▼ Select a street at the start.

REVIEW

See the ramps to jump.

COMMENT

This conversation captures all the humour, originality and playability of the arcade machine. It seems very straightforward at first, but once med dogs, nutty street dancers, runaway tyres and even rogue drivers enter the fray, things start getting very tough indeed. It's great fun trying to get all the papers in the mailboxes, but my favourite part of the game is causing as much damage to non-subscribers' properties as possible! With its fantastic graphics and faithful arcade tunes, Paperboy should find a place in any arcade fan's cartridge collection.

GAUNT

The arcade smash has finally arrived on the Master System! This game was a sensation when it appeared in 1986, and this version has all the features of the original machine.

Each player (and there can be two at once) selects a character - either the Valkyrie, Elf, Wizard, or Warrior. Then you're thrown in at the deep end - placed in a huge scrolling dungeon full of creepy creatures and malevolent monsters! All you have to do is make your way to the exit - not easy because there's a vast army of creatures out to knock down your health points.

The levels are littered with treasure chests, which give bonus points when collected. Food can also be found which adds 100 points to your health, and there are also potions which give temporary benefits such as invulnerability and spells which damage or kill everything on-screen when unleashed.

Gird your loins, hoist your axe, and prepare to enter the dark catacombs to kill the dragon - but write your will before you go!

▲ Treasure galore, but those piles of bones have a nasty habit of becoming ghosts!

◀ Don't be fooled by this shot - the action is fast and furious!

▼ Do you really want to go in there?

TWO-PLAYER LAFFS

The game really comes into its own when played with a friend. They don't have to start simultaneously, but can join in at any stage. Thor the warrior makes a good companion to Marlin, as his superb shot power and 20% armour gives him real muscle to cleave his way through the dungeon while Marlin stands back and bleats from afar. But don't ignore Thyre the Valkyrie and Quastor the Elf - they both have useful talents!

▼ Don't forget to collect the keys in the right order.

▲ Which way must you go to get the potion?

WHO TO BE?

Marlin the Wizard is the best character to choose when playing solo: his shots and magic power are very powerful, and are quite capable of destroying the monster generators scattered around. His lack of armour and poor hand-to-hand skills mean that it's best to dodge foes whenever possible.

Thyre the Valkyrie is tough, fires strong shots and can use magic well - a good character for solo play, but not quite as good as the wizard.

Questor the Elf is very puny and hand-to-hand combat causes him much damage. His shots aren't particularly powerful, but he can use magic almost as well as the wizard and can run faster than all the other characters.

Big, tough Thor the Barbarian is great for hand-to-hand combat - most baddies hardly scratch him. His shots are powerful too, but he's a bit slow and his magic powers are almost zero.

MONSTER MUNCH

There are a variety of monsters - here's a list so you know what to expect.

SORCERERS: Can turn invisible so that your shots go right through them! Use hand-to-hand for the best results.

DEMONS: Shoot fireballs at you from a short distance. Biting causes less damage, so use your sword or staff.

GHASTS: Must be shot before they get too close. Do not let them get near.

LOBBERS: Carry large rocks and throw them at you. They run away when you get close.

GOBLINS: Big baddies who attack from a close end - charge you.

WATH: The most dangerous of all. Do some health checks before you go in.

▲ Use your missiles to keep these nasties at bay.

COMMENT

JULIAN

Gauntlet has appeared on virtually every home computer system on Earth, and I'm glad to say that the Sega version tops the lot for sheer addictive playability. The game is played at a tremendous speed, and each dungeon is packed with literally hundreds of vile and gruesome creatures all out to get you - as you can imagine, it's action all the way! As well as being very playable, the graphics and sound are also excellent. The sprites are small, but they're superbly detailed, and the backdrops are very polished, giving the game a true arcade look. With 100 different levels to challenge you, Gauntlet won't lose its appeal in a hurry. If you've got a Sega, do yourself a favour and plug this into it.

TURTLES GO MEGADRIVE

According to my sources from Japan, those green, three-toed dudes in half-shells, the Teenage Mutant Hero Turtles will soon be appearing on the Megadrive. Not in an original arcade adventure like the Nintendo game reviewed this month, but in a conversion of the hit coin-op. Great! - I'll save me some ten pence. And before you Nintendo owners start getting your knicks in a twist, a Nintendo version is also currently being programmed. And if you've got a Sega Master System - tough pizzaz.

MEGA CD-ROM

I've just got wind of the CD-ROM player that Sega are currently working on for the Megadrive. It's an amazing sounding machine, with huge potential. Unlike the PC Engine CD-ROM and forthcoming Amiga CD-TV CD-ROM machine, it doesn't suffer from "blank screen syndrome" as new data is loaded in. Oh, no. The Sega machine is capable of loading data while simultaneously running a game, digitised pictures, or even CD-quality sound! 'cos it's got an extra custom processor in the CD-ROM unit itself. Sounds brilliant to me! I can't wait to see Dragon's Lair - a supposedly flawless copy of the complete arcade game which has been converted to run on it. Went the good news? It'll cost around £100 when it's released. How about the bad news? It won't be available until next Christmas. Boo!

PC ENGINE COMING

A spokesperson from NEC in America has revealed that the PC Engine will definitely be launched in this country next year - not in this little white console form we know, but in the guise of the big black American TurboGrafx 16. About flipping time too! With stonking good games like Gunhed, Devil Crash, PC Kid, R Type, Final Lap Twin, the PC Engine - or should I say TurboGrafx - deserves to be given a chance here in the UK. I just hope NEC pick a sensible and affordable price tag. £99.99 would make it a winner in my eyes...

HAND-HELD FUN

Another piece of NEC gossip that was whispered into my ear-like was that the hand-held PC Engine, the TurboExpress will appear in Europe in the first quarter of next year. What with Atari's Lynx II and Sega's Game Gear, both colour portables, set to appear next year, I think it's time for me to buy some shares in Duracell and Ever Ready.

KEEP ON BONKING

And still on the subject of the PC Engine, I've just discovered that PC Kid has been renamed Bonk in the USA. That would be funny in itself - but the advert for the game has the slogan "Bonk your way to success" on it. It never worked for me...

YOB'S GOSSES

KONIX SHOCK NEWS

No. Sorry, I'm lying. There isn't any.

SIMULATION STIMULATION

One of the big arguments computer owners use when putting down consoles is that console software is all simplistic arcade-style stuff. Well, now you Megadrive owners can tell them to go sniff a dog's bottom - coming in the not-too-distant future to your machine are G88 Attack Sub, a submarine warfare simulation, Spectrum Holobyte's super flight simulation, Falcon, Microprose's superb aerial combat simulation, F-15 Strike Eagle II and the tank battle simulation, Abraham's Battle Tank!

RPG NO RIP

And still on the same subject, if those self same people try and pull the "well my computer runs complex RPGs with loads of depth" stunt, you Megadrive owners can make their joysticks will with envy when you reel off this list of forthcoming whopper RPGs: Ultima VI, Phantasy Star II, Vermillion and Y/S - all feature battery-backed RAM game-save options, a vast playing area and loads of depth.

32-BIT MEGAMACHINE

Another Sega leak is that work is well underway on their new 32-bit super-console. It'll be based around the technology used in their new 32-bit arcade machines, which basically means loads more power, loads more sprites, loads more colours, loads higher definition and it'll most probably cost loads more money than the Megadrive. It'll certainly blow all existing consoles right out of the water - unfortunately it won't be seen until 1992. Ah well! Something to look forward to I suppose.

ATARI RUMOUR

It's rumoured that Atari are about to produce a new console that's as powerful as the Neo Geo at an "affordable price" - somewhere around £200.00. It's called the Panther and incorporates powerful custom processors. I don't know anything else - so don't ask me any questions about it.

Alright, that's it for this month. By the way, if any of you lovely industry people have any naughty gossip - give the office a ring. Confidentiality guaranteed.

Cowabunga! It's pizza time! Well, it would be, but April, the Turtles' trusted friend, has been kidnapped by the evil Shredder who hopes to indoctrinate her into his gang. The Turtles have no choice but to go and rescue her - a mission that is fraught with danger all the way!

The game is split into two sections. The first of these is an overhead four-way scrolling view where you guide a Hero between sewers and buildings, evading Clan soldiers and Roller Cars as you go. Once inside a structure the game changes to a side on view as you progress in platform-style areas fighting off the multitude of badies that appear.

Any Turtle may be chosen to begin with, but if his Life Meter is reduced to zero he's captured, forcing you to select a new combatant. Captured Turtles may be rescued, and this has the effect of giving you another life.

Extra energy is gained by collecting pizza slices, and additional weapons and ropes to climb with can be picked up by defeating your foes. Underwater scenes must be completed within the time limit or you drown - turtles breathe air, not water!

▲ Watch out for those bad guys up top.

▲ Climb the ladder to reach higher levels.

TEENAGE MUTANT

TURTLES

▼ Who are these dudes?

TURTLEMANIA

Will this craze ever reach a peak? It all started in the early 1980's, when two men - Laird and Eastman - decided to make a comic that parodied the current trend of young superheroes whose powers were a result of a genetic fluke (such as the X-Men and The New Mutants). It became surprisingly popular, and the merchandising began to roll out. Now, not only is there a cartoon and soon-to-be-released film, but also action figures, beachballs, mugs, lunchboxes, clothes, furniture, food - you name it, it's got Turtles on it!

HERO ZES

▲ One of the many characters.

▲ Splinter offers advice to the Turtles between levels.

MUTANT PACK

If you're a Turtles fan who's looking at buying a new console, you might be interested in the new Mutant Machine Turtle Pack. It's a special edition package that features a Nintendo console (complete with joystick etc) and free copy of the Teenage Mutant Hero Turtle game. The pack costs £79.99 - which is pretty good value for money.

PIZZAS Whole or partial they renew your Turtle power.

ROPE Gets you from building to building in the later levels.

SHURIKEN Either one or three at a time, these give you the chance to blast the baddies before they get close.

KIAI Destroys everything in its path.

BOOMERANG Same effect as shuriken, but if you catch it as it returns you can use it again!

MR INVINCIBILITY: Makes you invulnerable for a short time.

COMMENT

JULIAN

I was a bit disappointed to discover that this isn't a conversation of the brilliant Turtles coin-op, but once I sat down and actually played the game I soon cheered up. It's a very original and very addictive arcade adventure which requires planning and a good deal of arcade skill to battle through the sewers and kick some Foot ass without being captured.

The graphics are excellent and the sound is a faithful rendition of the Turtles TV theme music (not the hit single, Turtle Power). Put it all together and you've got a totally radical game that every Turtle dude should get his mitts on - pronto!

▲ Both these pics show the overhead scrolling action where you can enter buildings and sewers.

RAPHAEL

The needle-tipped Sai is Raphael's preferred attack tool. The speed and grace of his strikes are what he prides himself on.

MICHELANGELO

Compared to his comrades, Mike's power is only average. Enemies around his feet usually fall prey to his nunchukus onslaught, and his courage will amaze you.

LEONARDO

Leonardo's primary weapon is the hair-splitting Katana blade. He's most effective when attacking sewer enemies, especially ones that lurk overhead.

DONATELLO

The dreaded Bo is Donatello's form of amusement. Don't be fooled by the fact that it looks like a simple stick, because this baby can take out enemies from both above and below.

To be honest with you I was expecting this to be a complete pile of turtle droppings. So I was pleasantly surprised to find a good game lurking behind all the hype; this is a genuinely

MATT

original and interesting product. The graphics are excellent, if somewhat on the small side, and the soundtrack is fairly close to the theme music. The four amphibians come across as being different, each having its own abilities and weak points. It's a shame the game doesn't have a two-player option. Other than that, it's a very playable game that deserves to sell by the lorryload.

THE MOVIE

Hey dudes! This is so cartoon! The soon-to-be-released live action Turtle movie features the Turtle gang, their Master Splinter, Casey Jones and April O'Neil battling their arch-enemy, the Shredder and his Foot Clan army. It's a ninja-kicking mayhem all the way as the heroes try and stop the crime wave that's sweeping New York - no prizes as to guessing who's behind all this evil! Julian saw the film when he was in the USA earlier this year and reckons it's brilliant - so watch out for it as cinema near you at the beginning of December!

BIONIC COMMANDO

Super Joe Crack, the star of Commando (Capcom's Arcade hit of yesteryear) has been captured behind enemy lines! For a mission too tough for even a veteran warrior, you need to send in a superior soldier. Enter the Bionic Commando - a cyborg so menacing he can make any enemy's trousers turn a nasty shade of brown...

Not surprisingly, it's you that takes control of the mechanised mercenary, who must travel into hostile territory dealing out vast quantities of death and destruction (what else?), as well as contacting undercover agents on the way to rescuing Super Joe.

The digital mayhem is displayed via an eight way scrolling landscape - mainly consisting of some very nice scenery and platforms. There's loads of enemy troops on the look out for marauding commandos - and all of them are crack shots with their zap guns. Add to that the inhospitable territory and the sheer vastness of the enemy's bases and installations, and the chance of success are not very good at all!

Nintendo Bionic Commando differs from the coin-op original in a number of ways. Although the general platform gameplay remains very similar to the original, you'll find a number of additions in this NES interpretation...

▲ Our brave commando attempts the underground section.

YOU NEED HANDS

Top on the list of our hero's essential ka is his Multi-Purpose Extend-A-Melic Bionic Arm. It's the biz for reaching platforms that are too high to reach by foot, and it can be used for collecting any goodies that vanquished foes may care to leave behind. Another use that this mechanical wonder possesses is the ability to give enemy troops a good bionic smack in the gob!

COMMENT

MATT

Arrrgghhh! What an amazingly frustrating game! You're going to need nssr god-like gamesplaying prowess in order just to progress past this first level! But difficulty level apart, you can't deny that Bionic Commando is great to look at, sounds groovy, and has a large, juicy dollop of playability on offer - enhanced by the superb bionic arm. You can't fault this game a depth either as there's a huge variety of levels to conquer. Unfortunately, the absurd difficulty level coupled with the lack of continues may well stop you from ever seeing the inside in store in this later levels.

STRATEGY CITY

Well, here's a thing that wasn't to be found in the arcade original - a bit of strategy! On the tactical map, the Bionic Commando's progress through the zones is charted and you can keep tabs on enemy patrols - essential for planning a mission free from unnecessary entanglements.

SECRET AGENT ANTICS

Plenty of clues on locations of weapon dumps and even information on the captive Super Joe Crack can be revealed by contacting undercover agents in the Communications Rooms. You can also patch into enemy comms and see what dastardly plans they've got lined up for you...

BIONIC COIN-OP CAPERS

Capcom's Bionic Commandos didn't exactly set the arcade world on fire when it was released way back in 1987 - mainly because it was so difficult to find a machine to play on! Still, the coin-op provided arcadesters with five very tough levels of bionic platform excitement - much like the game reviewed here, but lacking the strategy screens and the Ikari Warriors-style raid section. But what it did have was a simultaneous two-player bionic thrille - thus the slightly different title. Check it out for rarity value alone if ever you should meet the machine on your arcade travels.

NINTENDO

REVIEW

▲ In the control room you can access the computer.

▲ Helicopters attempt to blow you away on the later levels.

COMMENT

Wow! Here's a game to get your teeth into! Bionic Commando is tough from the start, and within minutes you're screaming your head off and hurling the joyed around with frustration (well, I was)! However, if you can rise to the challenge, the game has plenty on offer - the combination of arcade action coupled with a bit of strategy works very well indeed, and the bionic arm adds a whole new dimension to the gameplay. I must say that even though it's tough, Bionic Commando is an addictive and enjoyable game with plenty of lasting appeal - try it out if you're after a real challenge.

Difficult, but still an entertaining platform romp - essential for platforms 'n' ladders fiends.

It's time once more to put on those Linford Christie skin tight running shorts and your Nike trainers, and show the world your athletic prowess in this Sega conversion of the ancient Epyx multi-event joystick-bashing sports simulation.

Summer Games features five events: the 100m dash, the pole vault, gymnastics, 100m freestyle swimming and the high dive. Each can be completed in turn, or can be played separately. Points are awarded for performance, with the medals being dished out for first, second or third place.

The competition is tough, and with one to eight players being able to participate, you've got your work cut out to grab a medal. But with hard work and lots of training, you too could become one of the great pentathletes of the gaming world.

Freestyle - but where's the competition?

You've made a slow start, but keep pumping the buttons to catch up!

THE 100m DASH

This pits you directly against a computer or human opponent, and requires plenty of fast, rhythmic fire button bashing to ensure maximum speed.

THE EPYX EPICS

Summer Games was originally released for the Commodore 64 and Atari 8 bit computers way back in 1984. The game was very successful, and Winter Games,

World Games, Summer Games II, World Games, California Games, and The Games: Summer and Winter Editions were released on home computer. So far only Summer Games, California and World Games have been released on the Sega - but maybe the rest will follow. We'll keep you posted.

THE POLE VAULT

Tricky one, this. Once you have started running, you have to gauge correctly where you have to drop the end of the pole in order to flip yourself over the bar.

100m FREESTYLE SWIMMING

Just a case of pressing the pad to throw yourself into the pool, then bashing the fire buttons for all you're worth. At the 50m mark, your swimmer flips over, ready for the return to the start.

COMMENT

MATT

Unfortunately, as far as the Sega is concerned, the series is gone on the decline. Starting with the excellent California Games (which still ranks as one of the best Sega games ever), and the rather ordinary World Games, and now continuing with this, which, I'm sad to say, is the worst of the three. Stupid, blocky and somewhat deformed sprites jerk around plain and boring backdrops to the sound of flat, totally inappropriate tunes, altogether crushing any thoughts of taking part in the next Olympics. With only five events, the interest is held for the first few minutes, and not even enhanced with more than one player. Even if you're desperate for a Track and Field game for the Sega, steer well clear of this.

THE HIGH DIVE

This is split into four separate parts; the forward dive, the back dive, the inverse dive, and the back inverse dive. You've simply got to do as many somersaults as possible and enter the water straight to ensure maximum points.

COMMENT

JULIAN

I've a huge fan of California Games, and had high hopes for the rest of the Games series. However, World Games was just average, and Sledge has taken a turn for the worse with Summer Games - it's terrible. The graphics are small and have little detail, and the backdrops are bland beyond belief - surely there was scope for some amazing animation here. The gameplay is very dull, most events requiring simple button-beating to succeed, and those that don't are easily mastered. Even if you're a big fan of sports simulations, you'll more than likely find this very disappointing.

You're going for gold!

Make sure you land upright to get points.

GYMNASTICS

Simply press the button to start you running, then press the button to vault from the springboard onto the horse. Then flip yourself over to land upright on the mat.

MEGADRIVE

Moonwalker is the officially licensed game of the film, and features "Whacko" Jacko himself and all his top toons as he tackles the marauding hordes of Mr Big and rescues his kidnapped kiddie chums.

The action is platform-based, with levels set in a seedy nightclub, city streets, graveyard, underground caverns, and the enemy base. Each level is split into three sub-levels and Michael must travel through these locations searching for his friends while fighting off the goons of Mr Big by kicking, punching and using special Jackson magic.

Animals play a part in this unsurprisingly "whacko" game - dogs attack you constantly on the second level, black cats leap out of windows at you, and even Bubbles (Michael's pet chimp) appears in order to guide you to each end-of-level showdown!

As well as the soundtrack, the game features animated sequences from the film, such as Michael converting himself into a car and a plane, and also sampled oohs, aahs and even enatches of speech! This game is one to look out for - expect a full review as soon as it's released.

OOOOOH!

The game starts with Michael entering the club end, as in the film, casually flicking a coin across the room into the jukebox. This not only starts the music off but also triggers all the thugs and loose women to start attacking the plastic pop star! They can't like his music much...

UUUUUH!

Each level features a Michael Jackson soundtrack - the complete track list is: Smooth Criminal, Beat It, Another Part of Me, Billie Jean and Bad.

AAOW!

The most amusing sections of the game occur every time you complete a sub-level. Mr Big appears, cackles insanely, then leaves you to fight off hordes of baddies. If Michael has enough magic left, he can use it to spectacular effect - pressing the button down for a few seconds makes all the baddies line up with Michael and dance along with him (this is especially funny when they are dogs) and are all killed off at the end of the sequence with a smart-bomb style AAOW!!!

Breve Sir Arthur the Knight is back, once again searching for his girlfriend who has been kidnapped by Luciter!

The mission of mercy is set over five scrolling levels, starting in the graveyard, then moving to hall desert, up a castle's battlements, down through icy underground caverns and finally inside the castle dungeon.

Our hero can run and jump and is initially armed with a lance that can be thrown left, right, up or down - but it's best to throw it in the direction of the nearest baddie. These horrors come in a multitude of shapes and sizes: vultures and skeletons are among the first to be encountered, and later worms and even Cerberus (the mythical three-headed dog) bar your progress.

Being hit results in you losing your armour, meaning that you must go on in your undies - another hit means death. Some things, like the Venus flytraps, kill you automatically, but either way death comes quickly and frequently.

The end of level guardians are huge and deadly and must be shot repeatedly to finish them off. Needless to say, they don't just stand there while you attack, but unleash various forms of attacks to be avoided! It's a tough game. But did anyone say it would be easy?

THE WEAPONS

There are a variety of weapons to pick up. You start with lances, which are pretty useful. Daggers are good too. Swords are great for killing things on the ground, and the axe is better to split targets.

◀ The lance, your first weapon

Axes deal death to most baddies

◀ Sword - not very powerful. Try not to pick it up.

▲ Timing is needed to pass the guard

▲ Enemies must be shot

▲ His sword's bigger, so watch it!

What a stunner! Not only does *Ghoule 'n' Ghosts* have some of the best graphics and sound you're likely to see and hear on a console game, it's also one of the hardest games you're likely to play. But even though it'll have you cursing with frustration, it's so good you just keep on coming back for more. *** YOU'VE TRIED THE REST!! NOW TRY THE BEST ***

Oh no! Your girlfriend has just been mercilessly machine-gunned down by a gang of villains. There's only one thing to do - call your friend and go and avenge her death.

This sequel to the Tecmo coin-op includes all the features of the original Double Dragon - the heroes can punch, jump, do spin kicks and even get their enemies in a strangle-hold - but the landscape is far bigger and there are far more baddies to bash. These guys come in an array of forms and some carry weapons, including knives, shuriken, chains, and bats. One particular female duo leaves a bomb that is capable of blowing you right off the screen!

End of level guardians block the way at regular intervals, and it's up to you to discover the method to dispose of them. And once you've beaten them all you can take on the gang leader and get revenge..

DOUBLE

BIFF!!

▲ The first end-of-level baddie.

▲ The helicopter approaches at the end of the rooftop section.

WEAPONS

The weapons can be grabbed to make life a lot easier for a short while. Knives can be thrown, so you don't have to get too close to your opponents, and baseball bats let you simply walk up to someone and start smashing. The most fun is to be had with the lethal-looking chain - swing this a few times and most enemies lie down and die. Unfortunately the weapons disappear as soon as their previous owners do.

LOOK BEFORE YOU HIT!

Double Dragon II has a two-player mode where both vigilantes travel across the landscape as a team. This is very useful for dealing with large gangs of bad guys - but watch you don't hit your friend in the melee, as both players are capable of hurting one another!

COMMENT

Although Double Dragon II looks a bit rough around the edges - the scrolling is jerky and the sprites flicker when things get busy - it's a great fun to play. The multitude of baddies to bash and the sheer variety of backdrops and weapons make this one stand head and shoulders above most Nintendo beat 'em ups. The two-player mode is where the game really comes

JULIAN

into its own - acting as a team with a friend is thoroughly enjoyable and very rewarding. But even with a single player, Double Dragon is a highly entertaining game. If you've already got Double Dragon, I'd think twice before buying this as it's very similar to the original. If you haven't got it though, check it out.

COMMENT

MATT

I found Double Dragon II good fun, with plenty of interesting opponents and fast action. However it is very similar to the first Double Dragon and gives the impression of just following straight from the teller. The scrolling is often poor and flickery but the sprites are well animated. There's no doubt that this game will sell by the tonnyload, and why not - it's a great game that deserves to do well, and will keep you coming back even when you've finished it. Well worth a look at least.

Ever wanted to ride in a motorcycle Grand Prix? This game allows you to experience all your biking dreams, as you take part in a variety of races around the world in this rip-roaring conversion of Sega's bike racing coin-op.

There are two modes of play, both of which have a simple objective - be the first past the finishing post. As well as racing against other riders, you also race against the clock. Between the starting and finishing points on each track are a series of checkpoints, which you must pass before the time limit runs out. Failure to pass the checkpoint means the end of the race - race past it, though, and extra time is added so you can continue onwards towards the checkered flag.

At the end of a race all the time remaining is converted into bonus points, and your overall race time is displayed for posterity - see if you can break the record!

▲ Each continent relates to a skill level - how good do you think you are?

ORIGINAL MODE

The original mode is an ongoing challenge where you race against a series of opponents over a variety of tracks. When you start, the tracks are short, the opponents are rubbish and the bike is very slow and unresponsive. However, if you win a race you're awarded money with which you can buy extra bits for your bike like lubes, brakes and chassis to make it go faster and handle better. As you progress, the opponents get better and better, and the courses get more and more challenging - so you have to make sure you keep winning to keep your bike in a compelling state!

MEAN MACHINES

GOOSE!

Three things that you really shouldn't do on a real bike 'cos they're dangerous and naughty.

WHEELIE. Whizzzz! A too-quickly yanked throttle results in the front wheel rising majestically from the tarmac while the bike travels forward at speed.

BURNIE: Phee-oo! Not a restaurant, but it does have something to do with cooking - is the back tyre.

Absent-mindedly forgetting to release the front brake while giving the throttle some slack means much less wheel rubber tending.

COMMENT

Ah! This is what I like! The chance to ride a very high-powered bike up a twisting road at unbelievable speeds. The graphics are tremendous, with a perfectly convincing road (complete with gut-churning hills) and excellent sprites giving a true feeling of high speed. The sound is also good, with four racing tunes to set the pace. The arcade mode is as

JULIAN

accurate a copy of the coin-op as you could wish for, and there's the additional bonus of the original mode (which would be a good game in its own right) which adds plenty of lasting appeal. Super Hang-On is one of my favourite Megadrive games - if you're into speed, race off and buy it now!

ARCADE MODE

On the title screen there are two game modes to choose from - arcade and original. Arcade mode is a straight conversion of the coin-op, and, like the original machine, gives you four tracks to race on: beginner, junior, senior and expert. Each track is progressively longer, and is also more twisting - the real challenge is trying to win the expert race. That takes some doing!

STOPPIE:

Yikes! Applying only the front brake at speed could well mean the rear wheel lifting off the deck. Do it at top speed and the rider can be ejected from his seat to land on his helmet (oo-er) some considerable distance away

REVIEW

COMMENT

MATT

I'm in something of a dilemma with this game. It certainly is a great racing game, with plenty of fast action and high quality scrolling. It conveys a superb sense of speed, and all the selectable in-game tunes are catchy little ditties. The choices of game type adds a lot to the playability as the original mode gives you a feeling of planning for a season rather than a single race. Yet I feel that the game is lacking that certain something to make it an all-out winner. Still, it's a great game to play and is full of excitement and thrills - it racing's your thing, don't miss it!

GET YOUR KNEE DOWN

You have to be comparatively you must get used to the way the bike handles. At corners you can get your knee on the deck (check out the steam from your Supa Smoke-o-rama knee pads) and slide the bike around the bend - but don't crank the throttle back too much or the back end will slide out from under you and you'll chuck the bike down the road! Try and anticipate corners so you can lean into them, otherwise you'll end up on the wrong side of the track heading towards an advertising hoarding and certain doom.

THUNDERFORCE 2

▲ The brilliant Five-Way shot in action.

Well, guess what? Aliens are invading again, and it's up to you to stop them in your turbocharged laser death spitting starfighter of doom. Surprise! Surprise! Surprise!

On the first level the action is viewed from above, and you have to fly around the multidirectionally scrolling screen and blast four ground installations. Naturally they're well defended, and swarms of aerial craft try and stop you in your tracks.

Neutralise the quartet of targets and you move onto the next level, a horizontally scrolling affair that's once again packed with very hostile aliens and a big guardian at the end. Once that's out of the way it's back to an overhead view, and the game continues to switch viewpoints in that order all the way through its nine levels.

Throughout the game there are a wide variety of power-ups to collect which are activated by judicious use of the A button. Drones, three-way, wide-shot, and many more give you the ability to cut great swathes through the enemy. Each weapon has its strengths and weaknesses, so careful choice is required.

▲ The huge tank at the end of level 2.

BIG blue nasties! Time to run away. ▶

TOP YOUR SCORE

Thunderforce III has plenty of secret bonuses. For example, clearing the first screen in under a minute gives you a hefty 250,000 points bonus. And on level two there's a 500,000 point bonus for... well, we're not going to tell you - but it's got absolutely nothing to do with shooting things. See if you can discover how to get it!

THE SEQUEL COMETH

Direct the airplanes and fire them conveniently on the side.

Currently available on import, and officially available in this country next year is Thunderforce III. It carries on from this version with the addition of more powerful weapons, even meaner aliens and some of the most astonishing graphics we've seen on the Megadrive. Looking even further into the future, we've discovered that programmers Technosoft are currently working on Thunderforce IV. We'll be featuring both these games in future issues.

COMMENT

I'm in disagreement with Matt here, but then shoot 'em ups are my favourite type of game. The sprites aren't particularly good, but the beely sound effects enhance the frenetic action no end. Levels one and two are quite straightforward, but from then on it gets pretty tough, and later levels really test your skills, with loads of very nasty

JULIAN

plenty of secret bonuses to uncover. Thunderforce II will keep you coming back to top your highest score for quite some months. If you like a good blast, this is well worth looking at.

▲ These flying Breins don't take much damage.

▶ Long range shots on a horizontal level.

FIREPOWER UNLIMITED

Thunderforce III's weapons are more powerful than others. Learn which one suits your playing style the best.

WIDE SHOT: Devastate those on either side of you!

TWIN: Megapower directly ahead - good in tight areas.

CLAW: A drone which circles around your ship and fires extra shots.

FIVE-WAY: Creates swarms of energy waves over a wide area.

FLASH: Forward and rear-firing megablast.

WAVE: Thick band of high firepower - the best for the horizontal levels.

CLASH: Medium power shots, but covers a wide area.

DESTROY: A big swirling energy burst - long pauses between shots, though.

HUNTERS: Reasonably powerful, but home in on the enemy.

▼ Drop down quick and blast your way through.

▼ Lawks-a-Lordy! Large laser-lobbing louts litter later levels!

▲ OK, you've got the Destroy weapon, but where's the enemy?

COMMENT

MATT

Thunderforce II is great fun - for a while. But I think you'll get bored with it fairly quickly, as the gameplay is quite limited. Having two different types of scrolling sections is a good idea, but neither format stretches the Megadrive to its limits. This is true for the graphics and sound as well - the sprites aren't particularly good, the backdrops are alright and the sound effects are meaty, but I think the machine is capable of better. Having said that, the action is fast and furious while it lasts - I just wish there was more to it.

▼ Fun on the first level.

TRUXT

There are three power-up weapons: lightning rays, green lasers and extra red firepower. Lightning rays are good for mass destruction, but aren't so effective on end-of-level baddies. Green rays are powerful, but are shot in a thin, straight line, which means you have to move around a lot if you're going to destroy everything. The best weapon is extra red firepower, giving both high destructive power and a wider firing range - you also get a shield with this weapon!

▲ The weeby basic shot. Grab some power-ups quick!

▲ Using super blobs of death blast 'em!

▲ It's in range! follows your foes around.

▲ The Big Tank - first end of level jumbo!

▲ The drones have set movement patterns - learn them and you'll be able to avoid them easily.

▲ Extra life ahoy!

COMMENT

MATT

Truxton grabbed my interest from the beginning despite its unoriginality. The graphics may not be the flashiest seen on the Megadrive, but they are large and colourful and serve their purpose well. The power-ups are excellent, my favourite being the lightning bolt - this allows you to unleash electric death on the nasties from any angle, your beam following them around the screen! All in all, a great game that should be welcome in any school 'em up fan's collection.

▲ Second boss, and guess who's got no smart bombs?

ON

Aliens are steering five asteroids towards Earth, guarding them with a host of nasties armed to the teeth! Guess who's the only one stupid - sorry - brave enough to try and stop them?

This shoot 'em up casts you as a space fighter pilot inflicting as much damage as possible on the swarms of flying aliens and ground installations that are, naturally, trying to shoot you down.

There are a host of power-ups to be collected, as well as extra weapons, extra lives and more smart bombs. The smart bombs themselves are represented as skulls, and unleashing them causes a huge skull-shape to flash across the screen, killing everything.

The end-of-level baddies come in a variety of shapes and sizes and usually in numbers of two to four. It takes a lot of firepower to eliminate them and even when you do, the remnants for the next level - different alien scum still keep coming!

HOW TO POWER-UP

Weapons are upgraded by collecting the flashing tokens left behind by dead aliens. Power-ups need to be collected in quantity to push you onto the next level of destruction, while the smart bombs are on a one-to-one basis. Changing weapons is achieved by snatching up the relevant coloured pod left behind when a ground installation is destroyed.

▲ A partial shield is little comfort, but better than nothing.

COMMENT

JULIAN

Truxton is a fine example of a pure, no-frills arcade blast. Just fly up the screen in your Supe Daathmobile and dish out laser doom to the oncoming baddies. At first the going is quite easy, but once the aliens start firing back and begin to attack in large numbers, the game becomes very challenging indeed - just wait until you tackle the exploding light bulbs (well, that's what they look like) on level three! The graphics are pretty straightforward, and the sound is alright, but when it comes down to gameplay, Truxton has plenty of blasting thrills and spills on offer.

Skateboarding has been big for ages now, with clubs, magazines, and whole shops devoted to the sport. Now, if it's raining or you've broken your trucks, you don't even have to leave your bedroom to go 'boarding - so long as you've got a Nintendo and a copy of *Skate or Die*.

The game casts you as a rad dude in a post-holocaust future. The aim is prove your abilities to Rodney Redcoose, the owner of the Flash 'n' Asphalt Skateboard Shoppe who, along with his mates, rules the roost around town.

The game is divided into five different sections: the downhill race, freestyle on a half-pipe, downhill jam where you fight an opponent, half-pipe high jump and pool joust where you battle other players.

Control of the board is by "regular foot" or "goofy foot", which give either rotational or directional controls - you just pick the one which best suits your playing style. There's also choice between competition mode or practice mode, to allow you to practice before you enter the real challenges.

Super Monaco GP is a conversion of Sega's own rip-roaring road racing coin-op, and just like the arcade game it gives you the chance to race a field of manic drivers around the famous Monaco street circuit. But unlike the arcade game, there's also a complete World Grand Prix option - but more of that later.

At the start of a game you get the choice of three formula cars, B Class (automatic gearbox), A Class (four-speed manual), and Super A Class (seven-speed manual) - the cars increase in power and performance respectively.

Before you enter the actual race, you first have to run a qualifying lap, and the better your time, the better your grid position. Then it's onto the race itself - and time for some really fast driving!

▼ Driving into barriers at 300 kph can be hazardous to your health!

WORLD CIRCUIT

Not only is Super Monaco GP a brilliant coin-op conversion, the programmers have also included a complete World Circuit option which features all the famous race courses you could think of. At the start of a racing season you're given a low-powered car, and simply have to race against a whole field of other drivers and win to gain as many points as possible. If you do well, a top team might invite you to join them, and you'll get an even better car to drive!

SUPER

► No, you can't choose a German as a rival - after all, we're all friends now!

◀ He's right behind you, but the tunnel will make it difficult for him to overtake you.

▼ Rave to maximum as you zoom off the starting grid.

▲ In the pile, How can you win the race when all your mechanics speak Japanese?

▲ We still haven't got a clue what they're on about. Teatime, perhaps?

MONACO GP

POLE POSITION

Each car's position on the track is very important. The preliminary lap determines your starting location on the grid. Once off, a number on-screen shows the position limit. Fall behind this limit and the race is over. Stay in front and you can keep on racing.
